User instructions

Default codes

Master	1 2 3 4 5 6 7 8	
Manager	1 2 3 4 5 6 +	Optional Dallas key
User 2	0 2 - 0 2 0 2 0 2 +	Optional Dallas key
User 3	0 3 - 0 3 0 3 0 3 +	Optional Dallas key
User x	x x – x x x x x x +	Optional Dallas key

Dallas key
In the event that the user is composed of "code + Dallas key", before or after entering the code, the Dallas key must be placed on the appropriate Dallas key reader.

Override users
Override users open without waiting the time delay. In the default programming they are set in dual code opening but, upon request, the single opening mode can also be set.

Silent alarm
It is activated by increasing or decreasing the last digit by one number when entering the opening code.

Penalty
After four attempts to enter an incorrect code, the lock starts a 4-minute delay period. Each attempt to enter the code within the 4 minutes delay period restarts the count.

Low battery warning
A message on the display and a long beep during opening indicates a low battery level. Replace immediately the low battery with a new Alkaline battery.

Sound signals
A double beep ♪♪ normally indicates a correct operation. A long beep ♪♪♪♪♪♪ indicates an incorrect operation and the end of the operation itself.

Recommendations
Do not use easily identifiable codes such as 123456, dates of birth or other personal information.

Opening (It is recommended to change the factory code before use and to safely store the new code)

Press any key to turn on the device. The display shows the message:
